The Pioneer Merchant

ALLIES MAKE BIG GAIN ON WEST FRONT

TAKE THREE MILES OF TRENCHES

The French and British have captured three miles of German trenches, on the Somme front, driving forward at points to a depth of 300 to 500 yards.

The most important gains were made where the lines of the allies meet, and this advance brings the allies right in front of Combles, a large railway town. Two of the most important points held by the Germans, at Maurepas and Clergy, have been flanked.

The road between Maurepas and Guillemont has been reached. South of the Somme the French take three-fourths of a mile of trenches.

MORE FIGHTING AT SALONIKI

ALLIES FORCING BACK BULGARIAN TROOPS ON 100 MILE FRONT

The allies have been making good progress on the Saloniki front since the first of the month. They have captured the railway station at Doiran, and four villages at other points on the front.

Naval encounters, near the Dutch coast, are reported from Flushing, Holland.

Germans are reported as being sent to defend Trieste.

ASSAULT CASE

Mrs E. Conwell was up before J. P. McCulloch on Wednesday, charged by Harry Johnson, with assault. Mrs. Conwell pleaded guilty and was fined \$10.00 and costs.

NO BLACK RUST IN ALBERTA

CROPS TOO FAR ADVANCED TO BE DAMAGED

There has been practically no damage from rust this year in Alberta. A small case of rust was reported at Carlsland and one at Cardston, but they are isolated cases with no danger of it spreading. The rust attacks the stalks of the grain so that no nourishment reaches the kernels, which wither.

WAR NOTES

The Italian offensive which has never slackened since the fall of Gorizia has pushed forward between three and four miles along a front of 20 miles.

Heavy fighting has been resumed between the British and the Turks along the front east of the Suez canal.

Bad weather has hampered operations on the western front for several days.

VonBothmer has lost half of his army in his attempt to stop the Russian advance.

The French captured 2,000 prisoners during the last week.

Ninety thousand Canadian troops are now fighting on the Somme. After having held the Ypres line for over a year and losing 20,000 men, they have been relieved.

The King has been visiting the trenches during the past few weeks, and inspected the ground recently taken from the Germans.

Parcels sent to prisoners of war in Germany must not be wrapped in linen, calico, canvas or any other textile covering.

The Germans have been no doubt using this material for making explosives, and the new order is to prevent this material getting into Germany.

Russian troops are crossing to the western banks of the Zlota Lipa and Bystrita and are advancing along the upper Stripa. They have captured Jahlonitz, one of the main gateways through the Carpathians.

They have also cut the Lemberg railway, where it crosses the Stripa river.

The losses of the allies are now only about one-fifth of what they were during the drive last fall in Champagne, or during the first months of the Verdun battle.

STRAYED

Strayed, on April the 6th, one black mare branded on the right thigh. Was heavy in foal. \$10.00 reward for information leading to recovery.
D. S. JOHNSON PROVOST

FOR SALE

House and lot in town. Will sell at cost. Apply at News Office.

LADY URSULA'S HUSBAND

BY FLORENCE WARDEN

Ward, Luck & Co., Limited
TORONTO

(Continued)

Evans demurred at having to leave without the pearls, which he was allowed to see and admire. But he understood the necessity for caution in dealing with such a determined spy, and in the end he departed, grumbling, after making a fresh appointment for the delivery of the pearls. It was arranged, that is to say, that, as soon as Lord Eastling should have followed Evans out of the hotel and given him in charge, or entered into conversation with him, Paul should slip out after them, and make his way to a certain flat in Westminster, where Gane would be waiting to receive the pearls.

This matter, among the two parties with just enough noise to rouse Lord Eastling's attention, and Evans went along the corridor, whistling softly, expecting every moment to have the young viscount's hand laid on his shoulder.

But he felt nothing of the kind. Evans was allowed to go out, Lord Eastling's door remained ajar, and Paul wondered, as he glided softly out after an interval of about a quarter of an hour, whether his confounded brother-in-law, worn out by his exciting day, had fallen asleep. But the young man whom he looked upon as a fool was not so simple as he seemed.

It was on Paul's shoulder that Lord Eastling's hand fell, before the former had gone the length of the corridor. Startled, Paul turned and found his brother-in-law smiling at him rather grimly.

"You've forgotten me, Payne," he said. "We've stuck together all day, we'll stick together to the end. Where are you going?"

Paul growled.

"Back to bed," he said, as, with a violent jerk, he threw off the viscount's hand.

"All right," said Lord Eastling good humoredly, "I think that's an excellent suggestion. And now let me make another. Where have you got back to Court tomorrow? And I shall let you out of my sight till we're there—you'd better tell Mrs. Finchden that you've found her pearls."

CHAPTER XIII

Lady Emmeline was not at all disconcerted by the discovery that she had to make her appearance at Court tomorrow. She had been very careful not to let it be known at Whitehall how very much she had enjoyed her first visit there with her brother and sister, or to give more than a sketchy and casual description of the family, the forests, and the life led at that particular east-going country house.

In confidence she had told her sister, indeed, that it was just the sort of country house where those things which come out in the newspapers on the occasion of a millionaire's bankruptcy might conceivably happen.

The tone of the house, that is to say, was by no means high. And Lady Emmeline, being, although younger than Lady Ursula, much more observant than she, recognized the fact at once.

But then there were compensating advantages, and Lady Emmeline admitted to herself that one of these was the Jackson's son, Hugo.

At first she had been rather shocked by the freedom of speech which he allowed himself, and had been inclined to think that her brother's liking for him was surprising. But having on the occasion of her first visit found the young man good-natured, she was astonished to find herself quite eager to meet him again.

As it happened, he was the very first person she met when she drove up to the door with her maid.

Hugo, in his red coat and hunting tops, was smoking a cigarette outside the great front door, which was in the best style of brand new Elizabethian architecture. He threw away his cigarette and opened the door for her before a footman could get down the steps.

"Awfully glad to meet you, Lady Emmeline," said he. "You're in time to go to the meet. Do make haste and get into your habit, and come along. I'll wait for you."

Lady Emmeline, on the broad, new Elizabethian steps, shook her head.

"I can't," she said. "I haven't even brought a habit. I understood that we had come to work: that Tom was

W. N. U. 1117

to go about pushing electors into other people's motor-cars and sending them off to the poll, and that I was to spend my time bribing—No, no, I mean giving old women tea and snuff, and little boys and girls pen-knives and dolls, so that their fathers' hard hearts might be turned in the right Tory direction."

Hugo waved his hand majestically. "Those," he said, "are the discredited manoeuvres of pre-historic Radicals."

"Oh! were there any pre-historic Radicals?"

"I think there must have been, Are we not taught that in palaeolithic ages—I'm not quite sure whether I've got hold of the right word, but no matter—the world was full of fearful beasts?"

"Oh, surely you're not so illiberal as to deny any sort of right to the other side?"

"Hugo" and gone up to the steps, and were crossing the great brand-new medieval hall at a leisurely pace, in a direction desired by Hugo. And then—

"No," said he magnanimously, "I don't deny that the Radicals may be honest when they're poor. It's your rich Radical who seems to me such a humbug."

"Is he more of a hypocrite than the poor Conservative?"

"Oh, you may be poor and yet may see that it isn't worth while upsetting things for the off-chance of growing richer, when there's more than a chance that you may get what little you've got instead. But I've no patience with the fellow who has got all he wants, and who tries to stir up discontent among those who've got nothing, and who can never expect to have much more. It's an artificial product, the rich Radical or Socialist, and a bad one at that."

Lady Emmeline listened, and meanwhile she found herself being led to a big, pleasant morning-room, where a bright fire was burning.

"There was no one in the room, and Hugo invited her to sit down by the window, and look out at the horses and groomed waiting on the drive for their riders."

Then she returned to politics.

"It's interesting to hear you say that," she said. "Do you know I was afraid you might be on the other side?"

"Why?"

"Well, you know—"

"She stopped, rather at a loss."

"You mean, because my father is a self-made man, you expected him to be a Radical still?"

"I thought it possible. At any rate, I suppose he was."

"She stopped again."

"A Radical once? Rather! He was everything—Radical, Socialist, Syndicalist, in fact he went the whole hog."

But now, well, of course it's different. So instead of changing his politics, he allows them to be smothered by ours, do you see?"

Lady Emmeline could not help laughing.

"You see," went on Hugo gravely, with twinkles in his eye, "it's safest to hedge. With us we're at the top, where I'm sure I hope we shall stay, for I shouldn't a bit like to have to carry the weight of anything of that sort."

The politics of the children suit the occasion very well. If we were to topple over, come to smash, then my father could go forward again with his politics, and we, his children, should have to smother ours."

"How about honesty then?" asked Lady Emmeline shyly.

"Well, each would be of his own way of thinking still," said Hugo, "only one's attitude is bound to change as one grows up."

There was a pause, and she said:

"Oh, I forgot to explain why Tom isn't with me. He told me to say he would be here this afternoon. He's gone up to town with Paul, my brother-in-law."

Hugo frowned.

"And Finchden?" he said.

"Yes."

(To be continued)

To Locate a Storm

As soon as you see a flash of lightning, count the seconds before you hear the thunder clap and in this manner you can easily determine how far away the storm is. Since light travels 186,000 miles a second, we may for all practical purposes regard ourselves as seeing the lightning the instant it flashes. But sound travels 1,087 feet a second. Multiply 1,087 by the number of seconds during the interval between the flash and the thunder and the result is the distance between you and the storm. As a rule, from twelve to fifteen miles is the greatest distance thunder can be heard.

The Kaiser will always be accredited as the author of the greatest slaughter that has yet befallen the human race. It is held that Lord Salisbury by his discovery of antipole surgery, has been the greatest savior of human life.

England, Spain and Switzerland have prohibited the exportation of needles, and the knit goods industry of France is suffering from its inability to purchase knitting needles from these countries.

A New Continent

Settlement of the Interior of Australia to be Soon Realized

The news that the Australians are building two thousand miles of railroad to open up the interior of the country doesn't even interest the average American.

"Well, what of it?" he is apt to say. "Nine in every ten Americans know almost nothing about Australia and care less. But the Australians hope to make us take more interest in them as their export trade develops. It is for the development of this trade as well as for general opening up of the country that they are building two thousand miles of railway through a desert."

Few of us realize what a mighty continent Australia is—that it is larger than the United States; that it is farther from east to west across the continent than from New York to San Francisco; and that it is south than from Duluth to New Orleans.

"But," you say, after looking at a map, "it is only a vast, arid, and desolate coast; across the whole interior is printed 'The Great Victoria Desert.'"

Yes; and there was a time within memory of men, not very old, when across in the interior of America, where Kansas, Oklahoma, Colorado and Nebraska are now primarily, was a vast, arid, and desolate desert. The building of the Union Pacific and other railroads proved the American Desert to be no desert at all, but a productive country.—From the Kansas Evening Star.

A German Prediction

Written Three Days Before the Grand Offensive

We must be quite just to the Germans. And as prophets no one will proclaim them exemplary. Their prediction about Calais did not materialize. Their breakfasting in Paris had also to be postponed. Liege was to have been battered off the map in an hour, and Petrograd, if we mistake not, was to be taken in a day.

The Krupp guns on the second Christmas after the war. We have a notion that the prediction shared the fate of those that "Tanks" indulged in about the end of the world. It didn't come off.

The finest thing, however, in German prophecy was that just three days before the grand offensive of the Allies on the western front began, it was published by the organ of the Kaiser, The Berlin Lokale Anzeiger, which we ought to add, is a pretty well conducted organ in its way.

Their breakfasting in Paris had also to be postponed. Liege was to have been battered off the map in an hour, and Petrograd, if we mistake not, was to be taken in a day.

Mecca's Stone of Tears

Tradition Says It Was Once Pure White, But is Now Black From Many Tears

Year by year a great pilgrimage consisting of from 150,000 to 200,000 Moslems, make the journey to Mecca, and it is on these occasions that daring men have risked the dangers associated with such an enterprise, and endeavored to gain access to the Holy City. But a wrong conclusion, a false word in one of the prayers, a little inquisitiveness in looking at some fascinating relic has been their undoing.

The cry has gone up, "A Christian," and the mob has rushed at them and torn them limb from limb.

Mecca is, indeed, the holiest ground of the Mohammedans, and the Mosque is the Holy of Holies. The building stands on ground which Arab tradition declares to be the centre of the world, ground which the Moslems believe to be a part of heaven on earth, and which will return to heaven at the last day.

Inside this building is the sacred black stone towards which all Moslems turn in worship. According to Mohammedan tradition this stone was given to Abraham by the Angel Gabriel, and was originally pure white, its present dark color being due to the tears shed for sins by the many pilgrims who visit the place annually.

In connection with the pilgrimage, it is worthy of note that last year it was the British government who arranged for the safe conduct of the "holy carpet" from Cairo to Jeddah, the port of Mecca, and one of the places captured by the Arabs.

For the year's last day, the sacred black stone towards which all Moslems turn in worship. According to Mohammedan tradition this stone was given to Abraham by the Angel Gabriel, and was originally pure white, its present dark color being due to the tears shed for sins by the many pilgrims who visit the place annually.

Thunderstorms and Milk

Lowering of Atmospheric Pressure Believed to be One Cause of Milk Turning Sour

It is common knowledge that milk is liable to sour and curdle more quickly during a storm than it does in normal weather.

Various theories have been advanced to explain this. A Frenchman recently suggested that the phenomenon is related to the fact that the pressure during storms, the barometric reading always being low then, the gases which are in the lower portions of the milk can more easily rise to the top and thus promote the action of the lactic acid bacteria.

Lightning has no direct effect and the only difference between the effect of summer and winter storms is that in the summer the higher temperatures make the milk more susceptible to bacterial action.

The souring of milk, being a fermentation reaction in which bacteria cause the milk sugar to change into lactic acid, proceeds rapidly or slowly according to conditions. Care in keeping milk clean and a free from bacteria as possible and keeping it cold tends to lengthen the period that it will stay sweet because fermentation is retarded.

On the other hand, carelessness as regards cleanliness and permitting milk to stay warm for the higher temperature effect because these conditions favor the fermentation process. Similarly the presence of these gases in the milk retards the fermentation or souring. Reaction products always retard a chemical reaction unless removed from the sphere of activity because they usually tend to set up some sort of equilibrium.

Since the cases rise more rapidly to the top and thus escape when the atmospheric pressure is very low during storms, this retarding effect which is normally exerted on milk fermentation is at least partially removed and the milk sours more rapidly. It suggests that if it were possible to keep milk containers air-tight during storm periods the storm could have no effect.

One Year of Prohibition

Beneficial Conditions Result From the Prohibition Law in Kansas

An important statement was issued by the Honorable J. C. Trickett, Assistant Attorney-General of the State of Kansas, in the year 1907 concerning the working of the enforcement of the prohibition law of that state in Kansas City, Kansas—with a population of 100,000—which adjoins the even larger and even more widely known railroad center known as Kansas City, Missouri, where liquor is freely sold.

Two years ago there were 256 saloons, 200 gambling houses, and about 60 houses of ill-fame. Now not one of these evils can be found. In that time the population has increased more rapidly than ever before, and the merchants and storekeepers have had to hire more help and the deposits in the banks have increased by one million dollars.

The attendance at the public schools has been so increased that 18 more teachers have had to be secured. The increase is most marked in boys and girls between the ages of 12 and 16, who, before the closing of the saloon, had to go out to work to help maintain the family because the father spent so much of his money on liquor.

The charitable institutions report that the demands for help have diminished two-thirds. Prior to the closing of saloons, the Juvenile Court had each month from 8 to 88 children before it who needed help. There have been only two such during the past six months. During the past twelve months, two young men have been sent to the Reformatory as against 15 to 5 for previous years. Expenses for prosecuting criminals have gone down \$25,000 a year, and the cost of the police force has been reduced as much more.

A striking paragraph in Mr. Trickett's statement is this: "A year ago the city was trying to devise ways and means to spare the money to build additional city jails. Today the doors of the jails swing idly on their hinges.—The Christianian."

A Difficult Piece of Consolidation

One of the most unenviable tasks of which a soldier can be trusted is consolidating a group. You may expect a lot from a barn, but that is not enough. It has to be put in place and in place, writes an official.

Sergeant R. Jones, of the 20th E. Co., R. E., was sent to do some work of this kind. He is a perfect fighting order. In the perfect fighting order, Jones was left in charge. Taking the initiative in encountering a bunch of enemy. But he persisted in delaying the enemy for over two hours, the fire getting heavier all the time. Although slightly wounded, the success of the job was finished and the good work was won for him a D. C. M.

All are resolved to do their utmost, but all too, are resolved that the great work they pay in toll, in treasure and in blood shall be paid for no half-results, for no patched-up, no ignoble, no unstable peace. Such a peace, the whole nation and the whole Empire has a right to demand, and with a fresh emotion, would make all their deeds and all their sufferings useless and vain.—London Times.

Note and Comment

It is about time that there was a system of rural telephones radiating from Monitor.

Practically every town west of here has rural lines and has had them for some time.

The line should also be extended east to the boundary, and connected up with the lines at Provost and Oyen.

"Our language is, beyond a doubt, a joke," said Mr. Blinn.
"For when a man is 'down and out,' We say that he's 'all in.'"

Canadian trade for April, May and June is 93 per cent ahead of that for the same period last year. Our exports and imports for the whole of last year amounted to the remarkable sum of \$1,400,000,000 and this year it is expected to reach about \$2,000,000,000.

Germany is threatening Holland because she wants the use of the Dutch canals to transport goods to Belgium from Germany. She is also after Switzerland, demanding food-stuffs. In desperation, Germany may try to coerce these small countries, but they will not have as much to fear for now, as there was two years ago, from German threats.

It is always best to look on the bright side of things.

The Austrians are boasting about the lickings they get.

Sir Douglas Haig tells the war correspondents that Britain will not be fully prepared for the land war until next summer. Haig has high ideals of military efficiency, and no doubt means that the millions now in training will need a lot of practice in actual warfare before they are fit.

The dispatch of Turk troops to aid the Austrians on the Russian front is not so much evidence of Turkey's military power as of Austria's extremity.

Pneumatic tires of chemically treated and compressed paper have been brought to notice in France. The material is said to be as strong as steel and as elastic as rubber, yielding tires that are noiseless, water-proof and cheap.

The following comments are taken from a German paper, and show some Kultur.

The English are a people of hypocrites, liars, and ruffianly thieves.

The Russians are barbarians, whose sole idea of warfare is to commit the most horrible atrocities.

The Italians are an absolutely putrid nation.

The French, whom their government for the moment holds under the knout, are, according to Voltaire, half tiger and half monkey.

A "National Peace Association" has been formed in Germany, embracing in its membership many eminent names, their object being to give lectures in about fifty cities and towns, "to prepare the minds of the German people for an honorable peace." Rightly interpreted, this means that the minds of the German people are to be prepared for the utter defeat of Germany, and the acceptance of any terms the allies seem fit to impose. Under Prussian militarism, the people have been accustomed to regard the Kaiser and his legions as invincible, and even yet the notion prevails where the true state of affairs has been kept quite.

Millions of German people are approaching the light.

The military force that was to make them masters of the world, now comes on its knees to ask for a measure of confidence. It has not paid.

The following statistics, from about 120 farmers in the Monitor district, give a fairly accurate idea of the acreage, etc., of the crops this year.

Wheat takes 64% of this year's acreage, an increase of 35% over last year. Oats 29%, an increase of 24%. Flax 5, increase 161%.

Barley 2%, a decrease of 19%. Stubble crops increased nearly double, which is offset by the big decrease in fall and spring plowing, and the increase in wheat acreage is accounted for by the remarkable increase of 275 per cent of summer fallow over that of 1915.

Last year 54 per cent of the wheat crop was on summer fallow and spring breaking, while this year 65 per cent is on the same class of land.

It is not known yet just what damage resulted to the crops from the frost, of last week.

While there is no doubt but what the late crops were touched, the crops that were fairly well advanced, appear to have escaped being damaged.

A tailor predicts the return of the cutaway. What fun it will be to see them on others!

The Turks are reported on the heights southwest of Mush. Clever of them to keep from falling into it.

The income tax as we know it today had its origin in the time of Pitt. The tax then imposed for the purpose of carrying on the Napoleonic wars was put at the rate of 2s. in the pound.

7,000,000 Women Work

Filling the Places Vacated by Britons Called to War

It is estimated that the number of women now working in war and peace jobs in the British Isles exceeds 7,000,000.

The wholesale withdrawal of men from the commercial and industrial ranks has resulted in a huge substitution of female labor for the purpose of maintaining the industrial output of the country. Many hundreds of women are training to become milkers and dairy hands in Scotland and Northumberland this sort of work is being regularly undertaken by women, while in Devonshire and other counties milking is being done even by young girls before they go to school.

Women are at the lathe, in overalls and caps, in the powder shed, working twelve-hour shifts on the motor buses or fashioning metal, timber and leather, carting, driving and distributing.

It has been recalled in connection with the melting down of church bells in Germany, that Cromwell had all Cork's church bells taken down and made into artillery, remarking that as gunpowder was invented by a priest, it was fitting the bells should be turned into "cannons."

Minard's Liniment Cures Colds, etc.**New C. P. R. Station at Toronto**

The old C. P. R. station in Toronto has been leased to the City for the nominal rate of \$1 per annum. The new north end station is now in full operation and, with its modern facilities and accessories, is giving great satisfaction to the public. The district in which it is situated has grown enormously during the past few years. The C. P. R. believes, not only in accommodating present needs, but in anticipating those of the future. That is why it builds largely and substantially in all large centres of population where there is promise of growth and development. What with the north end station in Toronto and the new station and terminal on Front street, which will be finished next year, Toronto is being rewarded at last with that attention which seems to have been denied the Queen City for many years.

"Why did Rev. Binks leave his charge?" He said his parishioners were guilty of contributory negligence.

Better Authority—"It was Shakespeare, wasn't it, who said: 'Sweet are the uses of adversity'."

"Shakespeare may have said it originally, but I heard it from a lawyer who had pocketed 65 per cent of an estate."—Boston Transcript.

Grape-Nuts

(Made in Canada)

embodies the full, rich nutriment of whole wheat combined with malted barley. This combination gives it a distinctive, delicious flavour unknown to foods made from wheat alone.

Only selected grain is used in making Grape-Nuts and through skillful processing it comes from the package fresh, crisp, untouched by hand and ready to eat.

Through long baking, the energy-producing starches of the grain are made wonderfully easy of digestion.

A daily ration of this splendid food yields a marvellous return of health and comfort.

Alcohol as Fuel

Chemist Suggests Use for Distilleries in Prohibition: Towns

In view of the fact that the Western provinces have adopted prohibition the question naturally arises as to what will become of some of the extensive breweries and distilling plants in Canada.

A former principal of Regina College suggests that these plants be equipped for the manufacture of commercial alcohol. The project is put forward by one who is by profession an analytical chemist and has given much thought to the possible uses to which these plants might be put after prohibition becomes effective. He has also suggested vinegar production, pickling, canning and cold storage.

In discussing alcohol as a fuel he states that the world's supply of gasoline is limited and unrenounceable and, therefore, with the increased use of the automobile and other forms of transport, the price of gasoline must rise. A British chemist's opinion that posterity will have to run to alcohol as fuel is quoted.

GOOD RICH BLOOD MEANS GOOD HEALTH

Just a Little More Rich, Red Blood Cures Most Ailments

The lack of sufficient rich, red blood does not end merely in a pale complexion. It is much more serious. Bloodless people are tired, languid, nervous, and their life expectancy is short. Food does not nourish. Indigestion, heart palpitation, headache, backache and nearly all nervous ailments are the result of bloodlessness. It is neglected too long a decline is sure to follow. Just a little more rich, red blood cures all these troubles. Then you have new health, new vitality and pleasure in life. To get more rich, red blood the remedy is Dr. Williams' Pink Pills. No other medicine increases and enriches the blood so quickly or so surely. This is not a mere claim. Dr. Williams' Pink Pills have done this over and over again throughout the thousands of people always have a good word to say for this medicine. Miss Gertrude Halmer, Kingston, Ont., says: "About a year ago I was suffering greatly with anaemia, so much so that I had to give up my situation. I became so weak that I could scarcely walk without help. I had no ambition, no color, no appetite and was constantly troubled with headaches and dizzy spells. I was taking medicine from the doctor, but it did not do me a particle of good. One day Dr. Williams' Pink Pills. Though as a result of my condition I was greatly discouraged, I began the use of the Pills, and thanks to that good friend's advice after using a few boxes I began to feel much better. Under the continued use of the Pills I gained in weight, my color came back and I grew gradually stronger. I looked so much better that people would ask me what I was taking and I had no hesitation in giving the credit to Dr. Williams' Pink Pills. I am so grateful for what this medicine has done for me that I will do all I can to extol it."

Minard's Liniment Cures Garget in cows.**Railroad Men Enlist****Over Six Thousand Railway Employees in Canada in Volunteer Army**

Of the 20 clerks in the C. P. R. offices at Calgary, 16 enlisted when the war broke out. Some of them have got promotions. One has been wounded, but the spirit they displayed has been noticed in the western press. Indeed, the railway men of the country have been called upon to answer the call. In England over 200,000 railway men are at the front; in Canada, possibly 6,000 in all have gone forward—splendid record, considering our railways and general population. The result of such depletion is found in the greater number of female clerks employed in the Dominion. We do not see, as they see without surprise in the Mother Land, thousands of women doing the outside work on the railways—dreadful! In Canada, many of them, cleaning engines, cleaning stations, acting as porters, and wheeling barrows, acting as ticket agents and telegraph operators. Women have come to the front, but the value of women in the clerical domain has gone up very appreciably indeed. It is urged in England that the women wear men's attire for greater convenience in many of the vocations they pursue. Many have not waited for the discussion in the press about the matter, but have voluntarily parted with external femininity. The situation is not so acute in Canada, but in all clerical departments is for female clerks.

State of Ohio, City of Toledo, Lucas County, etc.

Frank J. Cheney makes oath that he is senior partner in the City of Toledo, County and State of Ohio, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every copy of said book that will not be cured by the use of HALL'S CATARRH CURE.

Sold by Druggists, etc. Hall's Family Pills for constipation.

Raising Colts Without Oats

It is possible to produce strong, healthy draft horses without oats. In an experiment at the Kansas Agricultural College, after more than nine months' feeding, the colts that have had no oats are in better condition and have made a little better gain than those which ate this feed. The ration of corn, bran and linseed oil cost twenty per cent less than the oats ration.

The experiment includes twenty colts divided into two lots, with five pure bred, and five grades in each lot. The two lots have been fed the same sort of roughage—alfalfa, clover, timothy hay, corn fodder and pasture. One has been fed oats every day and the other has had a ration consisting by weight of seventy per cent corn, twenty-five per cent bran, and five per cent linseed oil. One pound of this mixture contains the same digestible elements as one pound of oats. Also, from the standpoint of energy value, the two feeds are equal, pound for pound. Each lot of colts has received the same number of pounds of grain.

Professor Lounsbury of Yale is a foe to the purist and pedant. On his summer holiday the professor gazed out across the lake one grey and sultry afternoon, and remarked:

"It looks like rain."

A pedant was seated in a rocking chair nearby.

"What looks like rain, professor?" he chuckled. "Ha, ha! I've got you there. What looks like rain?"

"Water," Professor Lounsbury answered, coldly.

"Has the scientific study made much difference in your boy, Josh?"

"Not as much as you might think," replied Farmer Cornsloss. "Out in the garden he calls everything by its botanical name. But when he's sitting up to the table, passing his plate, he's careful to use the kind of words as we all understand."—Washington Star.

Preparedness for Farmers

A Matter to Which Farmers of Canada Should Give Necessary Attention

Hard times and debt are the farmer's greatest enemies. Growing food for the family and for the live stock are his best form of preparedness against these evils. In the war for prosperity good gardens, fresh eggs, milk and butter, and a goodly haul, plenty of grain and hay—these are the weapons to use against the foe if success is to be obtained. The best managed farm requires that some farmer shall not buy food stuffs either for his family or his live stock. By proper preparedness methods, eggs will be provided for when the hens are not laying; fruit and vegetables will be in cans on the closet shelves when they are not in the garden; there will be canned meat, smoked meat or pickled meat, when fresh meat is not available and the silo will afford succulent feed for the stock when the green fields are bare.

A well balanced farm business insures against losses and provides a much better utilization of the labor and equipment. The matter of preparedness is one to which Canadian farmers should give increasing attention, in more seasons than our—Montreal Family Herald.

Tonsillitis, Sore Throat, Chest Colds, Can be Cured Over Night**They Vanish Quickly if Nerviline is Well Rubbed in**

When the throat tickles, when it hurts to draw a long breath, when you feel as if a knife were stuck in your side, it's time to draw out the congestion that will soon become pneumonia. An ordinary cough syrup has no chance at all—you require a powerful Penetrating Liniment.

Nothing is known that possesses more merit in such cases than Nerviline. Rub it liberally over the sides and chest—rub it in hard. The warm, soothing effect of Nerviline will be apparent in five minutes. Nothing like it for quick relief—takes soreness out of the throat in one rubbing—breaks up the chest cold, draws out the inflammation, stops the cough quickly.

Give Nerviline a chance on your neuralgia, prove it out for lumbago, see what it can do for sciatica.

No pain-relieving remedy compares in power to cure with Nerviline.

Largest sale in Canada of any liniment for nearly forty years. It satisfies every reason is plain.

The large 50 cent family size bottle is more economical than the 25 cent trial size. Sold by dealers everywhere, or the Catarthozone Co., Kingston, Canada.

The Bayard of the Turks

Turkish Commander Who Has Shown Himself to be a Gentleman

Apart from the courage and persistence with which the defence of Kut was conducted by General Townshend, the most notable feature of the siege has undoubtedly been the chivalrous attitude of the Turkish commander, Nur-ed-Din. The many stories which have been told of him may be apocryphal, but they appear to be founded on some basis of fact. At one time he was said to have proposed a truce while the Turks and English might together attack the British lines. He has been placed among the forces of either side and have behaved with incredible brutality to those wounded who have fallen into their hands. On another occasion he was reported to have driven a herd of cattle into the beleaguered town. These and similar tales may be untrue, but they illustrate the character of a man against whom his enemies have said nothing bitter. Like Nazim Pasha and other Turkish soldiers of the old school, Nur-ed-Din has shown himself a gentleman and a sportsman, and the readiness with which he has handed over all the sick and wounded will ever be remembered to his credit. He has displayed none of the vice of his German allies, but has fought cleanly and honorably, and so far as possible has endeavored to restrain the Arabs, fearlessly punishing those who have been caught in obeying orders. The Times of India.

Sores Heal Quickly.—Have you a sore throat? Rub Nerviline in to heat? Then, try Dr. Thomas' Electric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a fine skin for the new skin. It is the recognized healer among Oils and myriads of people can certify that it healed where other oils failed utterly.

A Word of Friendly Advice

Canada has a committee in the United States selecting and negotiating for the services of an expert in railway investigation who can co-operate in the coming thorough-going study of the Dominion's transportation problems. A word of friendly advice may be permissible, in the light of experience on the southern side of the border. It does not follow, because a man is a university professor and a licentiate in transportation problems, or in corporation security, that he is incorruptible, or a friend of popular rights. The record of the fight of the present generation against privileged business in the United States shows that technical knowledge has to be supplemented by honesty of character.—Christian Science Monitor.

Of the Same Class—"They say," remarked the spinster boarder, "that the woman who hesitates is lost."

"Lost is not the proper word for it," growled the ussy old bachelor at the pedestal extremity of the table. "She's extinct."—Philadelphia Ledger.

Medicant.—Sir, I have paralysis, six children to support, my wife is sick and I am about to be dispossessed. Stalled Motorist.—Piffle! Did you ever try to run a second-hand automobile?

Manitoba's Fish

The Piscatorial Features of the Lakes and Streams of Manitoba

The waterways, large and small of Manitoba are numerous. Several of such possess eligibility to be enumerated as gigantic areas. As an example, Lake Winnipeg, the ninth largest body of fresh water in the world, may be quoted. Few are Manitoba's lakes and streams in which piscatorial life is not abundant. A summary of the many tribes contained therein is as follows:

Sturgeon are habitues of the Red River; occasionally this monarch of fish life will be met with in the Assiniboine, the Winnipeg, and the Red. The sturgeon is the chief feeding grounds; at Black Bear Island a fishery is in operation, the "catch" being forwarded principally to New York and other centres of the United States. The whitefish abounds in Lakes Winnipeg and Manitoba. The goldeye is of general distribution; the perch frequents waters within northern provincial confines. Few lakes and streams do not contain the sucker, the black bass, catfish, a species devoid of scales and spoken of in the United States as the northern salmon. It is not possible to catalogue the dog fish as fit for human consumption; this species is utilized by the Indian as bait for pike of the larger size. Authentic record of the catch of the Peubina in Manitoba is not obtainable; the claim is made that specimens of this reptilian water inhabitant formerly tenanted the lower reaches of the Peubina. A few streams contain ray or sunfish; the pike or jackfish is indigenous to all waterways.

As an example, Lake Winnipeg, the ninth largest body of fresh water in the world, may be quoted. Few are Manitoba's lakes and streams in which piscatorial life is not abundant. A summary of the many tribes contained therein is as follows:

Sturgeon are habitues of the Red River; occasionally this monarch of fish life will be met with in the Assiniboine, the Winnipeg, and the Red. The sturgeon is the chief feeding grounds; at Black Bear Island a fishery is in operation, the "catch" being forwarded principally to New York and other centres of the United States. The whitefish abounds in Lakes Winnipeg and Manitoba. The goldeye is of general distribution; the perch frequents waters within northern provincial confines. Few lakes and streams do not contain the sucker, the black bass, catfish, a species devoid of scales and spoken of in the United States as the northern salmon. It is not possible to catalogue the dog fish as fit for human consumption; this species is utilized by the Indian as bait for pike of the larger size. Authentic record of the catch of the Peubina in Manitoba is not obtainable; the claim is made that specimens of this reptilian water inhabitant formerly tenanted the lower reaches of the Peubina. A few streams contain ray or sunfish; the pike or jackfish is indigenous to all waterways.

Manitoba's Fish

The Piscatorial Features of the Lakes and Streams of Manitoba

The waterways, large and small of Manitoba are numerous. Several of such possess eligibility to be enumerated as gigantic areas. As an example, Lake Winnipeg, the ninth largest body of fresh water in the world, may be quoted. Few are Manitoba's lakes and streams in which piscatorial life is not abundant. A summary of the many tribes contained therein is as follows:

Sturgeon are habitues of the Red River; occasionally this monarch of fish life will be met with in the Assiniboine, the Winnipeg, and the Red. SOUNDING LAKE

Sergt. M. Plumb of the 200th. C. E. F., is home again, for the harvest season.

Wheat harvesting is in full swing on most of the farms in this district.

The dance that was arranged for tonight has been postponed until Fri. the 25th, in Horseshoe Schoolhouse. Rain or shine.

CHINESE ATTACK JAPS

Chinese troops have attacked the Japanese garrison at Cheng Chiatun, near Mukden, and 18 Japanese soldiers have been killed or wounded.

The garrison is being besieged by the Chinese soldiers and reinforcements are being rushed from other points to Cheng Chiatun.

The arrest of a Japanese merchant started the fighting.

MINOR SCHOOL DISTRICT

J. Johnson has arrived with his threshing outfit.

L. Purdy has completed the erection of his fine new barn.

The Minor Syndicate Threshing Co., held their regular meeting last Saturday evening.

L. Seeman has greatly improved the looks of his house with a coat of paint.

There was very little damage here from the frost, last Thursday night.

We hear that George and John are the only "Decent Fellows" in the country—excepting in style!—Moral: There is so much good in the worst of us, and so much bad in the best of us; that it does not behoove any of us to speak ill of the rest of us.

NEW YORK'S SCOURFE

Up to last week the deaths, in New York city, from infantile paralysis numbered 2,100, and 5,310 cases had been reported to the health board.

The highest number of deaths recorded in one day was 57, all being under 6 years of age.

Several riots occurred on account of the quarantine regulations.

Bill Smith had just cause for complaint.

"Don't I always tell you," he said to his wife, "that I won't have the kids bringing in the coals from the shed in my best hat? The shape of that hat is spoilt."

"A little extra coal won't do no harm to yer hat," said his wife.

"You don't see the point," said Bill; "I only wears that hat in the morning, and if I takes it off me head it leaves a big black band around me forehead and the consequence is I gets accused for washing me face with me hat on. It ain't nice."

SAVED

Didn't Take Wife Long to Diagnose Hunk's Disease

"Take off your coat," commanded Dr. Sprittles gravely.

Rudolph Hunk obeyed, and the famous specialist on human diseases tapped him on the chest.

"There, hear it? Hear it?" cried the haggard visitor. "Hear it rattling!" "Odd! Odd!" commented Dr. Sprittles. "It may be a case of the rare Portuguese spindalix affliction."

And he tapped Hunk on the back, causing the dry, rattling sound again. "It's just me scared stiff for two days," shivered Hunk.

"Maybe its camidropsis quinsky, a north China disease," said the eminent specialist. "Or the Westphalian dribbitts, or even Japanese humslago. Call again in two days, meanwhile taking four of these pellets a minute. Twenty five dollars retaining fee, please."

Hunk handed over the twenty-five and went home, and after he had bravely told his wife the worst, she went over his vest pockets and extracted a tin box containing 1,100 talking machine needles that Hunk had purchased two days previously.

THE SIMPLE LIFE

The Cologne Gazette, in a recent article said that the food restrictions in Germany have brought many benefits in their train; that double chins and "corporations" have disappeared from Germany, and it has been noticed that the popular health is rapidly improving.

A well known surgeon, Prof. Kuttner, writes in the German review that appendicitis is disappearing as a result of the severe plainness of Germany's was diet, and other ailments and ills are also decreasing as a result of abstinence from rich food.

WHEN IT IS HOT

Consider Mr. Shadrach.

Of fiery furnace fame:
He didn't blent about the heat
Or fuss about the flame.

He didn't stew or worry.
And got his arsees in kinks.
Nor fill his skin with lines and gin
And other "cooling drinks."

Consider Mr. Meshach.

Who felt the furnace too:
He let it sizz nor queried "Is
It hot enough for you?"

He didn't mop his forehead.
And hunt a shady spot;
Nor did he say, "Gee what a day!
Believe me, it's some hot."

Consider, too, Abed-nego.

Who shared his comrade's plight:
He didn't shake his coat and make
Himself a holy sight.

He didn't wear suspenders
Without a coat and vest;
Nor did he scowl and snort and howl,
And make himself a pest.

Consider, friends, this trio—
How little fuss they made,
They didn't curse when it was worse
Than ninety in the shade.

They moved about serenely
Within the furnace bright,
And soon forgot that it was hot,
With no relief in sight.

Home-made yeast; Boil two ounces of hops in four quarts of water, for half an hour.

Strain off the liquid, and when almost cold add a cupful each of sugar and flour, half a cupful of salt and six large potatoes, boiled and mashed.

Put all into a large stone jar or bottle, cork securely, stand by the fire for a little while, and then store in a cool place, and it will keep fresh for two months.

The Italian government has broken off relations with Germany and the commercial treaty between the two countries denounced. Business relations with Germans have been prohibited. The government has assumed control of all firms financed by German capital.

There are about 50,000 Germans in Italy and they have several millions of dollars invested in various commercial enterprises.
